

Arhivo 0.71 SE

Portable programm for archieving documents.
It is like - 100% of WinRAR!!! It's free!!!

Also: **recomended to include/integrate to LiveCD as default archiever!**

It makes everythin, as WinRAR, can use sfx scripts of WinRAR.

Changes: cursors, icons in explorer, text of menus - corrected.

How to integrate it to your system:

- ☑ - unpack this archive of the program in reliable folder, to afterwards not to move and not to rename it much times!!!
- ☑ - delete/uninstall old version of WinRAR. Next – reload explorer or computer.
- ☑ - next – start Arhivo.exe and in menu on tab “options-settings-integration”, and also in subtab on the button "context menu items" choose needed points like on the picture in this document or customise points!
- ☑ - push OK and OK... reload explorer or computer.
- ☑ - OOOHHH YEEEESSSS!!! Now you have free best archiever!! I think you'll love it always.
